## Telkonet and SINLAK Holdings to Market High-Speed Internet Access System in Turkey

**Germantown, MD, Telkonet, Inc. (Amex: TKO), the leader in commercial powerline**

**communications (PLC)**, announced today that SINLAK Electronics and Telecom Co., a member of SINLAK Holdings, as a value-added reseller, will market Telkonet's high-speed Internet access system throughout Turkey. SINLAK Electronics and Telecom Co. is active in defense, construction, manufacturing, media, electronics, telecom and foreign trade sectors with accumulated total sales of \$4.6 billion since 1975. SINLAK, headquartered in Izmir, Turkey, is a manufacturer's representative with over 25 years of solid experience in the government sector. Now that Telkonet has received CE approval for its high-speed Internet access system, SINLAK can begin to finalize its agreements with hotels, government agencies and schools.

Since signing a contract with Telkonet in September 2004, SINLAK has been aggressively promoting Telkonet's high-speed Internet access solution to hotels in Turkey, where the system has been successfully tested and demonstrated. Because of SINLAK's strong relationships with government agencies, SINLAK also has demonstrated to the local police force how Telkonet's system could provide Internet access for their remote offices. In addition, knowing the versatility of Telkonet's system, which simply uses a building's existing electrical wiring to deliver in-building broadband Internet access, SINLAK has promoted Telkonet's system to the school system, where it would enable Internet access to all the computer workstations.

### **About Telkonet**

Telkonet's products provide connectivity over existing electrical wiring and do not require the costly installation of additional wiring or major disruption of business activity. In many situations, the Telkonet system can be implemented more quickly and less expensively than adding dedicated wiring or installing a wireless system. The Telkonet family of networking and internetworking products offers a viable and cost-effective alternative to the challenges of hardwiring and wireless local area networks (LANs). Telkonet's products are designed for use in commercial and residential applications, including multi-dwelling units and the hospitality and government markets.
